CMPK with D₃ DRENCH

Ready-to-Use

for Cattle

CMPK with D₃ Drench is a mineral supplement for use in fresh cows. It contains Calcium, Magnesium, Phosphorus and Potassium along with Vitamin D₃ to help maintain normal levels of these minerals around freshening. Use on every fresh cow or heifer before and after calving.

FEEDING RECOMMENDATIONS:

Shake well before using. Provide 200 ml at the first sign of freshening and another 200 ml 6 to 12 hours after freshening. Repeat as needed. If the first feeding is missed, a post-calving feeding is still beneficial. One gallon provides 19 - 200 ml feedings.

AVAILABLE SIZES:

20-204.....1 Gallon (3.8 Liters)

GUARANTEED ANALYSIS:

(per 200 ml)

Calcium (min.) 28.7g	14.35%
Calcium (max.) 29.4g	14.70%
Phosphorus (min.)08%
Potassium (min.)25%
Magnesium (min.)75%
Vitamin D ₃ (min.)	200,000 IU

INGREDIENTS:

Water, Calcium Chloride, Magnesium Chloride, Propylene Glycol, Potassium Chloride, D-Activated Animal Sterol (Source of Vitamin D₃), Turmeric, Egg Protein, and Chitosan.

Give Your Animals the Blue Ribbon They Deserve.
